[MY CONSOLE](#)

Suspicious Activity Alert

Publicly accessible Google API key for Google Cloud Platform project TB-Yucatan (id: tb-yucatan)

Dear Customer,

We have detected a publicly accessible Google API key associated with the following Google Cloud Platform project:

Project TB-Yucatan (id: tb-yucatan) with API key
AlzaSyDJkLkfx0Trhpsnho20fBmbvxvXfms-qCc

The key was found at the following URL: <https://github.com/smunozsader/tb-yucatan-centro-consulta/blob/0a93710516b631a4187e0e3af519d5d547a42bb2/static/js/main.f151cabb.js>

For a [subset of abuse issues](#), we send abuse notifications in log format. Please login to your console and review this abuse notification in [Cloud Logging](#).

We believe that you or your organization may have inadvertently published the affected API key in public sources or on public websites (for example, credentials mistakenly uploaded to a service such as GitHub.)

Please note that as the project/account owner, you are responsible for securing your keys. Therefore, we recommend that you take the following steps to remedy

this situation:

1. If this key is intended to be public (or if a publicly accessible key isn't preventable):
 - Log in to the Google Cloud Console and review the API and billing activity on your account, ensuring the usage is in line with what you expected.
 - Add [API key restrictions](#) to your API key, if applicable.
2. If this key was NOT meant to be public:
 - Regenerate the compromised API key: Search for Credentials in the cloud console platform, Edit the leaked key, and use the Regenerate Key button to rotate the key. For more details, review the instructions on [handling compromised GCP credentials](#).
 - Take immediate steps to ensure that your API key(s) are not embedded in public source code systems, stored in download directories, or unintentionally shared in other ways.
 - Add [API key restrictions](#) to your API key, if applicable.

The security of your Google Cloud Platform account(s) is important to us. To learn more about how to respond to abuse notifications and warnings, click [here](#).
